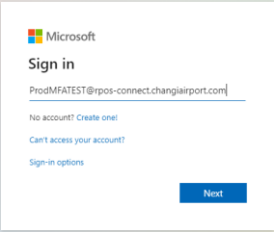
Multi-Factor Authentication

Quick Reference Guide

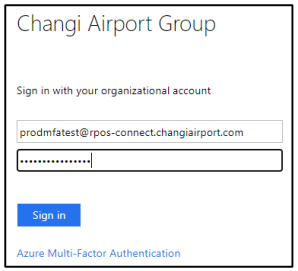
How to Update/Modify Authentication Mobile/Phone number

1. Log on to https://aka.ms/mfasetup using your username and password used to login to Dynamics 365 Application but with a different @domain as below and click **'Next'**

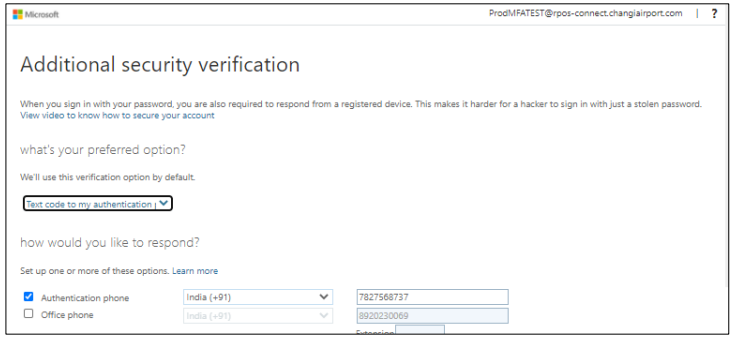
   CAG: your_login_id@rpos-connect.changiairport.com
   Jewel: your_login_id@connect.jewelsgp.com



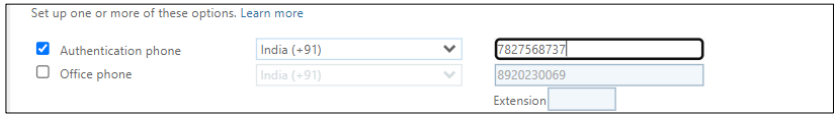
2. You will be re-directed to your organizations Sign-in page. Enter password and click on Sign-in. You will be then asked to authenticate against old number/app registered before.



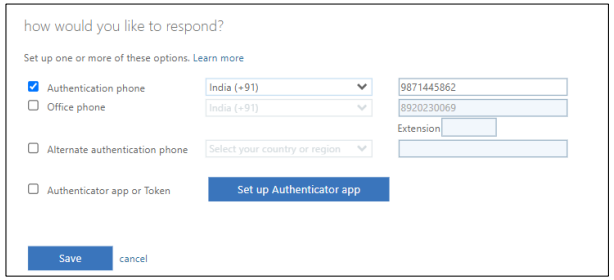
3. You will be redirected to '**Additional Security Verification**' page



4. Click on the text box for the number you want to update, and using backspace or delete button clear the old number.

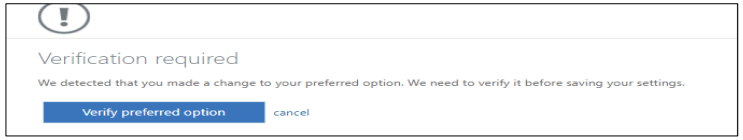


5. Once cleared, enter the new number you want to add, and then click '**Save**'

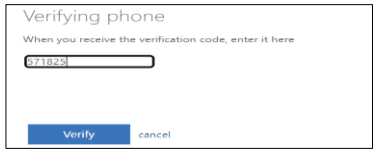


Note: Authenticator App can support up to max 5 mobile devices

6. Since you have made a change, you have to verify the change. Click on '**Verify Preferred Option'** on the notification window.



7. Enter the OTP received on the new mobile phone and click '**Verify**'



8. Once verified, you will get 'Update Successful' message. Close the notification and Sign-out. The update is completed.

Note: If your phone is lost, kindly contact NEC helpdesk (24/7 support) at 65505645 (Terminal 1 – Terminal 4) / 65505622 (JEWEL) or email to ca_pos@nec.com.sg. Alternatively, you can choose another verification method to Sign-in and make changes.
